Larry Cunningham Retires

Former Kewanna area resident Larry Cunningham has retired to enjoy the local rural life after spending the last 20 years as director of the Jennings County Public Library at North Vernon.

Cunningham was hired as director in 1986 at a time when the old 5,600-square-foot Carnegie Library in North Vernon was bursting at the seams. Eleven years later, after convincing the public of the need, he proudly moved the library's collection into a new 34,000 square-foot facility.

Cunningham sought a new design that focused on functionality rather than style. Although critics claimed the building was too plain and out of the way, it has proved to be a great asset to the area. The library houses 100,000 books (with a capacity of 136,000 volumes) in the spacious main browsing room. An array of public computers is available. A children's library and genealogy room are kept separate. There are also classrooms and conference rooms that can hold up to 300 or more people. These rooms are put to use every day and the parking lot is often full.

Larry had no intention of attending college after high school graduation, but a well-meaning uncle secretly submitted an application to Allegheny College in Pennsylvania where he was accepted and subsequently earned degrees in philosophy and history. He then followed a professor's advice and went on to earn a master's degree in library science from Indiana University.

After working as a librarian at DePauw University and Indiana State University, Larry got a librarian position with Bank Marketing Association in Chicago and then at Cummins Engine in Columbus. He then took the position as head of support services at Kokomo-Howard County Public Library before going to Jennings County.

His other activities include a five year stint as commissioner for the Columbus Housing Authority, chairman of the long range planning committee for local cable TV, member of the Indiana Library Association and Jennings County Growers, Inc., and chairman of the Jennings

County Community Foundation audit committee.

He became a member of Beta Phi Mu in 1962, was named outstanding faculty member at IUNW for the 1966-67 school year, was named ASM Person of the Year in Columbus for 1978-79, was listed in Who's Who in Education in 1963 and Who's Who in the Mid-West in 1983-84, was 2001 Kiwanis Citizen of the Year, and received the 2005 Chamber of Commerce Community Service Award.

Larry is the son of the late Loren and Guyla Cunningham. A widower, he has three daughters and four grandsons. He plans to spend his retirement on the family farm where he hopes his grandsons will be able to join him to spend some time in the country.

DEATHS.....

EILEEN D. DONATHEN

Funeral services were held at 11 a.m. EDT Monday, April 3, 2006, in the Kewanna Church of Christ for Eileen D. Donathen, 78, Kewanna. Pastor Scott Meneely officiated and burial was in the Kewanna Citizens-IOOF Cemetery. Mrs. Donathen died at 1:50 p.m. Thursday, March 30, at Hickory Creek Nursing Home, Winamac.

Born January 17, 1928, in Logansport, she was the daughter of William Curtis and Cora Mae Martin Hollis. She was married November 9, 1947, in the Kewanna Church of Christ to Charles "Bill" W. Donathen, who survives.

Eileen was a retired EMT with the Fulton County E.M.S. A 1946 graduate of Star City High School, she was a member of the Kewanna Church of Christ, Rochester Order of Easter Star Chapter No. 70, former Worthy Matron of the Kewanna Order of Eastern Star and a Rainbow advisor.

Eileen began working outside the home after her children were in school. She delivered newspapers from Kewanna to Middlebury, helped in the Kewanna school lunchroom and worked at Kewanna Metal Specialties and the factory at Lake Bruce.

She had always wanted to be a nurse, so decided to take the EMT course and work as a volunteer on the Kewanna Ambulance Service. She also worked in the emergency room at Woodlawn Hospital and took advanced training with the South Bend fire department. She enjoyed her work with the Fulton County Emergency Medical Service, spending over ten years helping people and making many good friends.

Bill and Eileen spent 17 winters in Florida, sharing these years with life-long friends, Bill and Marilyn Moon.

Eileen was a loving and faithful wife, companion and friend to Bill. She loved her children unconditionally and adored her grandchildren. She was very excited to be a great-grandmother when Andriana was born and elated when Aidan came along. She truly enjoyed spending time with her grandchildren and proudly attended the various activities they were involved in.

She was involved in many activities and groups throughout her life including the ladies group at her church, PTA, Home Economics club, Eastern Star and Rainbow. She had a great time playing bingo in Florida and bunco with her friends in Kewanna.

Eileen loved working in her garden. She was a great decorator and could paint and hang wallpaper with the best. She was a wonderful seamstress, making sports coats for the men of the family and designing her daughter's wedding dress. She

learned to crochet later in life and also tried her hand at artistry and crafting. She was an avid reader.

Eileen and Bill enjoyed many travels with Dream Tours, seeing the country and making new friends.

Surviving besides her husband are two sons, Larry Joe Donathen and his wife, Joyce, Franklin, and Jon Charles Donathen and his wife, Diana, Grass Creek; a daughter, Susan Hamman and her husband, Ken, Winamac; one sister, Violet Troutman, Kewanna; four grandchildren, Amy Smith and her husband, Doug, Amanda Donathen, Matthew Donathen and Alexander Donathen; and two great-grandchildren, Andriana and Aidan Smith. law enforcement and the men he has worked for has given him a good sense of what is expected of a sheriff. If elected, he intends to be an active sheriff, striving to bring the office to new heights by:

- Building upon the ideals that Sheriff Calvert implemented
- Continuing to bring professionalism to the office and the department
- Utilize the staff currently in place and possibly create a part-time secretarial position to extend the office hours into the evening/weekend.
- Continue to provide training for deputies and staff, while focusing on the areas of specialized interests they already have.
- Continue to improve upon the department's relationships with other agencies and the community as a whole.
- Build up the Reserve Deputy Program by allowing the merit deputies to have a voice in the candidate selection process, thereby improving morale as these officers must work together.
- Implement an employment contract with newly hired deputies and jailors to help the department minimize costs of training and uniforms, thus protecting taxpayers from unnecessary expenses.
- Continue to provide 24/7 coverage for the citizens of Fulton County.

needs are going to be shifted from the state to local government in the near future. Fulton County has many concerns and issues at this time. First and foremost is the overcrowding of the jail and the problems associated with methamphetamines, which is contributing to the overcrowding issues. Mark believes he possesses the knowledge and expertise to evaluate and assist with programs and processes that will lead the county away from this problem and begin building an effective means to deal with overcrowding in the jail.

Rodriguez believes that our educational systems are the foundation on which we build success. The diversion of funds away from education to other wasteful non-productive approaches needs to stop and he will strive to bring a proactive tactical planning approach versus a reactive poorly planned process.

He notes he has a complete understanding of the workings of county government and has served in several capacities and levels of government. He states that he also has the business experience and entrepreneurial spirit to be innovative and

creative. As he is self-employed, he has felt the pinch of the taxman and is sensitive to taxation issues.

Mark is married to the former Gayle Lebo. The couple has three grown children and three grandchildren.

Childhood Obesity on the Rise

The culture and our kids are changing. Is one causing the other?

Video games... fast foods... parental apathy...the scout leader...grandma...school lunches...Easter candy...bad genes...

What ever you think is the cause, the fact is over the past 20-30 years, the number of over weight children in the US has doubled. Approximately 1/3 of all children are overweight, and more than 15% are considered obese.

There are many risks and complications associated with obesity:

- Increased risk of heart disease
- High blood pressure
- Diabetes
- Breathing problems
- Trouble sleeping

However, poor health is not the only risk obese children face. Overweight children are frequently teased and may develop low self-esteem, eating disorders, social phobias or even clinical depression.

The first step in treating obesity is recognition. Once a child is found to be overweight or obese, any physical cause should be ruled out. However, such

conditions are rarely responsible. Diet and inactivity are the main culprits meaning eating too much and exercising too little.

The best goal is simply not to treat obesity when it is present, but to prevent it. So start early in your child's life to instill a desire for good nutrition, healthy eating and active play to avoid obesity and the development of long-term complications.

For more information on childhood obesity, call Sandy Roth, RNC NP, at 574-542-2552.

Tips for Changing Payment Requirements

As increases to minimum payment requirements on many credit cards begin this year, and adjustable rate mortgages – which were extremely popular over the past several years – begin to adjust, many consumers may start experiencing difficulties in meeting their monthly obligations.

According to Heartwell Mortgage Corporation, consumers should evaluate their payment and interest rate terms with each of their creditors and prepare for any adjustments that may happen in the coming months.

The primary changes that are affecting consumers are the result of new federal bank regulations that are increasing minimum

monthly credit card payments by as much as 100 percent. At the same time, more than one-third of those who started a mortgage between 2003 and 2005 took advantage of record low interest rates with adjustable rate mortgages (ARMs). Now the fixed interest rate periods of these programs are ending, with interest rates adjusting as much as 2%.

These increases in monthly payments can have a significant impact on a household budget. It is important for consumers to prepare for these adjustments. With a variety of remedies to either reduce or eliminate credit card payments or refinance mortgage programs, many consumers can avoid seeing any increase in their monthly payments. Consumers should evaluate their financial position at least once a year and talk with a qualified mortgage advisor to determine if their current mortgage should be revised.

Smoke Free Fulton County Annual Banquet, April 19

The third annual "Champions Awards" banquet sponsored by Smoke Free Fulton/Kosciusko Counties will be held Wednesday, April 19, at Las Cabanas Bar and Restaurant in downtown Rochester. It is an appropriate venue as Las Cabanas is the first smoke free bar in Fulton County. Head chef, Sebastian Villaseñor, and owner, Natalie Gehrich, will be presenting their famous multi-cultural buffet, a fusion of Mexican and American cuisine. The master of ceremonies for the evening is First Federal Bank's president and owner, Richard Belcher. Distinguished guests will include Karla Sneegas, Executive Director of Indiana Tobacco Prevention and Cessation and Jack Arnett, Regional Director of Indiana Tobacco Prevention and Cessation.

Seventeen major awards will be presented to Fulton and Kosciusko County organizations and individuals and fourteen special recognitions will be awarded to smoke free industries in Fulton and Kosciusko Counties.

Musical entertainment will be provided by the Rochester High School singing group, "The Beautyshop Quartet" composed of Leigh Soderlund, Chrissy Rosswurm, Kyra Lollar and Anna Helt.

Tobacco use is the leading cause of preventable death and disease in America. It accounts for one out of every five deaths killing more people each year than AIDS, alcohol, drug abuse, car crashes, murders, suicides and fires—COMBINED. Twenty-seven Hoosiers die every day from what Thomas Jefferson called "that wretched crop tobacco".

The mission of Smoke Free Fulton/Kosciusko Counties is to save lives and money by 1)increasing the proportion of residents not exposed to secondhand smoke 2)decreasing youth tobacco use 3)decreasing adult tobacco use and 4)protecting and maintaining a state and local infrastructure necessary to lower tobacco use rates.

Reeve's Death Underscores Dangers of Secondhand Smoke

By Karla Sneegas,
Executive Director
Indiana Tobacco Prevention/Cessation

For most singers and those who perform on stage, the path to success is often littered with cigarette butts, left behind in the ashtrays of nightclubs across the country.

It is through these smoky enclaves, people such as Dana Reeve and others find success. Sadly, it could be argued that it is the same place through which Reeve's exposure to secondhand smoke may have led to her developing lung cancer; a disease that, on March 6th, claimed her life at the age of 44.

Reeve's death is another reminder of the need for all workplaces to be smoke free and that we should protect ourselves from exposure to secondhand smoke. The effects of secondhand smoke and the danger it represents for all of us, especially for those whose livelihoods exist in a smoke-filled atmosphere, is well documented through numerous reports and studies in science and medicine. The smoke coming from burning cigarettes is putting workers, who are exposed on-the-job, at risk for respiratory, heart, and numerous other diseases and health complications.

Numerous people, including those who work as musicians, comedians, waiters, waitresses and bartenders, as well as many other blue-collar workers, have no choice when it comes to smoke free air. Just 43 percent of the 6.6 million food preparation and service employees and 52

percent of all blue-collar workers in the United States are covered by policies that require their workplace to be smoke free according to a 2004 article in the Journal of Occupational and Environmental Medicine (JOEM). Compare that to more than 75 percent of white collar workers who are protected from secondhand smoke while working.

Regular exposure to secondhand smoke also greatly increases a worker's risk for lung cancer. In fact, according to the same article in the Journal of Occupational and Environmental Medicine (JOEM), food service workers have a 50 percent greater

risk of dying from lung cancer than the general population. Another study published in the Journal of the American Medical Association, found that restaurant workers are exposed to levels of secondhand smoke that are approximately 1.6 to 2.0 times higher than those to which office workers are exposed on the job.

Anything short of a 100 percent smoke-free environment leaves employees' and patrons' health compromised. Secondhand smoke represents a deadly toxic soup of over 4,000 chemicals, 69 of which are known to cause cancer. Smoke doesn't stay behind walls. And no ventilation system can adequately remove the carcinogens in the air even when odors and visual smoke appear to be less. The American Society of Heating, Refrigerating, and Air Conditioning Engineers (ASHRAE) issued a standard to their membership of heating and air condition engineers that states, "ventilation cannot eliminate the health dangers posed by secondhand smoke and that the only way to effectively eliminate health risk associated with indoor exposure to tobacco smoke is to prohibit smoking activity."

For venues, such as nightclubs, bars and comedy clubs, workers are often afraid to speak up. Rene' Hicks, an accomplished African American comedienne, rose to stardom based on the success she garnered in clubs across the country. But, for her, the laughter stopped in 2001, when she was diagnosed with lung cancer. She had never smoked a day in her life. Or, as she puts it, "as I was killing on stage, the audience was killing me."

Fortunately, for Hicks, the effects of the disease claimed only half of her lung. But, having survived the experience, Hicks has adopted the mantra that "to live strong, you have to breathe strong". In 2005, she developed a public education message for Hoosiers that was distributed through ITPC's WhiteLies campaign to tell the truth that hides in the clouds of secondhand smoke.

The first week of April is National Public Health Week. It is an appropriate time to reflect on the public health problems due to secondhand smoke. The bottom line is that, not unlike many other public health problems that challenge us, it seems as though we have to get a "wake-up call" for something to get our attention. In the case of secondhand smoke and a disease as dreadful as lung cancer, we're saddened when people such as Dana Reeve lose their lives. The sad fact is that too many Hoosiers have lost their

lives to secondhand smoke too. And we can do something about it by creating smoke free workplaces.

As part of the 1998 Master Settlement Agreement from the tobacco industry, the Indiana Tobacco Prevention Cessation (ITPC) agency was created to

oversee funding to help with programs designed to help with cessation programs, as well as community initiatives, special youth features and enforcement. To that end, it is our hope we can help continue to make a difference and help bring about cleaner air for all of us.
